Materials Science and Engineering B31 (1995) 331–334

MATERIALS SCIENCE & ENGINEERING B

Subject Index of Volume 31

Al_2O_3
thermal diffusivity, heat capacity and thermal conductivity in Al_2O_3–Ni composite, 287
Angular oscillation
Angular oscillation of magnetoresistance in layered metals—Fermi surface geometrical resonance, 141
Annealing
rapid thermal annealing of thin doped and undoped spin-on glass films, 319
Antiferromagnetism
experiments on interlayer exchange coupling, 17
Artificial neural network
solid–liquid equilibrium of Ga–In–Ga–Sb system and artificial neural network prediction, 305

Band structure calculations
magnetoresistance in magnetic multilayers: a role of Fermi velocity, 111
Battery
a new silver ion conductor for battery applications, 249
Biquadratic exchange
density functional theory of the electronic and magnetic properties of interfaces and multilayers, 225

Clusters
structural and magnetic evolution in granular Fe-Ag alloys produced by the cluster beam technique, 133
Critical thickness
role of surface step on misfit dislocation nucleation and critical thickness in semiconductor heterostructures, 299
Cryo-electronic devices
a high T_c superconducting magnetic shield for cryo-electronic devices, 265

Density functional theory
density functional theory of the electronic and magnetic properties of interfaces and multilayers, 225
Dielectric loss and relaxation
dielectric properties of poly(phenylene-vinylene) thin films, 255
Differential thermal analysis
solid–liquid equilibrium of Ga–In–Ga–Sb system and artificial neural network prediction, 305
Diffusion
rapid thermal annealing of thin doped and undoped spin-on glass films, 319
Dislocation nucleation
role of surface step on misfit dislocation nucleation and critical thickness in semiconductor heterostructures, 299
DLC films
enhancement of tribological properties by dynamic mixing of diamond-like carbon/Mo films on steel, 269

Doping effects
a high T_c superconducting magnetic shield for cryo-electronic devices, 265
rapid thermal annealing of thin doped and undoped spin-on glass films, 319
synthesis and characteristics of the ceramic superconductors in the $Y_1Ba_2Cu_{3-x}Ti_xO_y$ system, 239
Dynamic atom intermixing
enhancement of tribological properties by dynamic mixing of diamond-like carbon/Mo films on steel, 269

Electrical measurements
giant magnetoresistance of artificial Ni–Fe/Cu, Ni–Co/Cu and Co–Fe/Cu superlattices and their temperature dependence, 213
magnetoresistance in epitaxial Fe–Cr(001) superlattices grown on MgO(001) and sapphire($1\bar{1}02$) substrates, 169
Electron conduction
field dependence of transport properties correlated with the giant magnetoresistance, 101
studying spin-dependent scattering in magnetic multilayers by means of perpendicular (CPP) magnetoresistance measurements, 77
Electrons
transport properties of titanium aluminides, L1
Epitaxy of thin films
magnetoresistance in epitaxial Fe–Cr(001) superlattices grown on MgO(001) and sapphire($\bar{1}02$) substrates, 169
Exchange coupling
experiments on interlayer exchange coupling, 17
spin current and exchange coupling in magnetic multilayers, 25
Exchange interactions
density functional theory of the electronic and magnetic properties of interfaces and multilayers, 225
interlayer coupling and magnetoresistance in Fe–Si multilayers with semiconducting spacers, 41
spin-polarized STM and its family, 69

Fe–Ag alloys
structural and magnetic evolution in granular Fe-Ag alloys produced by the cluster beam technique, 133
Film deposition
magnetic properties of multilayers from soft X-ray magnetic circular dichroism, 49
Finite-temperature theory
theory on the giant magnetoresistance in magnetic layered structures at finite temperatures, 31

Gadrinium ytteribium
neutron study on the subject of giant magnetoresistance effect, 57

Elsevier Science S.A.

Ga–In–Ga–Sb
solid–liquid equilibrium of Ga–In–Ga–Sb system and artificial neural network prediction, 305
Gallium arsenide
spin-polarized electron tunneling: the importance of the potential barrier shape, 65
Galvanomagnetic effect
field dependence of transport properties correlated with the giant magnetoresistance, 101
studying spin-dependent scattering in magnetic multilayers by means of perpendicular (CPP) magnetoresistance measurements, 77
Giant magnetoresistance
field dependence of transport properties correlated with the giant magnetoresistance, 101
giant magnetoresistance in magnetic nanostructures. Recent developments, 1
giant magneto-transport phenomena in granular magnetic systems, 127
spin-transport theory of magnetically inhomogeneous systems, 157
structural and magnetic evolution in granular Fe-Ag alloys produced by the cluster beam technique, 133
the application of giant MR films to magnetic devices, 207
theory on the giant magnetoresistance in magnetic layered structures at finite temperatures, 31
Giant magnetotransport
giant magnetotransport and magnetostructural phenomena in hole-doped manganese oxides, 187
Grain boundaries
sintering of ultrafine acicular TiO_2 powder, 261
Granular alloys
giant magneto-transport phenomena in inhomogeneous materials, 11
Graphite
conductivity measurements on graphite–ferric chloride intercalation compounds by contactless method, 281

Heterostructures
anomalous Hall effect in III–V-based magnetic semiconductor heterostructures, 151
tunnel-type GMR in metal–nonmetal granular alloy thin films, 219
High temperature superconductors
a high T_c superconducting magnetic shield for cryo-electronic devices, 265
synthesis and characteristics of the ceramic superconductors in the $Y_1Ba_2Cu_{3-x}Ti_xO_y$ system, 239
Hopping rates
a structural lattice-gas model of ion transport across a material interface, 275

III–V nitrides
dry etching and implantation characteristics of III–N alloys, 309
Indium arsenide
anomalous Hall effect in III–V-based magnetic semiconductor heterostructures, 151
Intercalation compounds
conductivity measurements on graphite–ferric chloride intercalation compounds by contactless method, 281
Interface roughness
spin current and exchange coupling in magnetic multilayers, 25
Intermetallic silicides
kinetic studies of the formation of nanocrystalline chromium silicide–silicon carbide form homogeneous amorphous precursor powders, 243
Ion implantation
dry etching and implantation characteristics of III–N alloys, 309
Ion transport
a structural lattice-gas model of ion transport across a material interface, 275
Ion-beam-assisted deposition
enhancement of tribological properties by dynamic mixing of diamond-like carbon/Mo films on steel, 269

Lattice-gas model
a structural lattice-gas model of ion transport across a material interface, 275
Layer structures
conductivity measurements on graphite–ferric chloride intercalation compounds by contactless method, 281
studying spin-dependent scattering in magnetic multilayers by means of perpendicular (CPP) magnetoresistance measurements, 77
Liquid-phase epitaxy
solid–liquid equilibrium of Ga–In–Ga–Sb system and artificial neural network prediction, 305

Magnetic anisotropy
epitaxial ferromagnetic thin films and superlattices of Mn-based metallic compounds on GaAs, 117
Magnetic field effects
giant magnetoresistance of artificial Ni–Fe/Cu, Ni–Co/Cu and Co–Fe/Cu superlattices and their temperature dependence, 213
interlayer coupling and magnetoresistance in Fe–Si multilayers with semiconducting spacers, 41
temperature dependence and angular dependence of the giant longitudinal magnetoresistance in GaAs-AlGaAs superlattices, 147
Magnetic measurements
magnetic properties of multilayers from soft X-ray magnetic circular dichroism, 49
magnetoresistance in epitaxial Fe–Cr(001) superlattices grown on MgO(001) and sapphire($1\bar{1}02$) substrates, 169
Magnetic multilayers
giant magneto-transport phenomena in inhomogeneous materials, 11
giant magnetoresistance in magnetic nanostructures. Recent developments, 1
magnetic structure of multilayers studied by Mössbauer spectroscopy, 93
perpendicular giant magnetoresistance of microstructured pillars in Fe–Cr and Co–Cu magnetic multilayers, 85
spin current and exchange coupling in magnetic multilayers, 25
spin-transport theory of magnetically inhomogeneous systems, 157
Magnetic recording
the application of giant MR films to magnetic devices, 207
Magnetic semiconductors
anomalous Hall effect in III–V-based magnetic semiconductor heterostructures, 151
Magnetic shielding
a high T_c superconducting magnetic shield for cryo-electronic devices, 265

Magnetic structure
giant magnetoresistance in layered Mn oxides, 193
Magnetic thin films
epitaxial ferromagnetic thin films and superlattices of Mn-based metallic compounds on GaAs, 117
Magnetization
giant magnetotransport and magnetostructural phenomena in hole-doped manganese oxides, 187
Magnetoresistance
angular oscillation of magnetoresistance in layered metals—Fermi surface geometrical resonance, 141
giant magnetoresistance in layered Mn oxides, 193
giant magneto-transport phenomena in inhomogeneous materials, 11
magnetic structure of multilayers studied by Mössbauer spectroscopy, 93
perpendicular giant magnetoresistance of microstructured pillars in Fe–Cr and Co–Cu magnetic multilayers, 85
studying spin-dependent scattering in magnetic multilayers by means of perpendicular (CPP) magnetoresistance measurements, 77
tunnel-type GMR in metal–nonmetal granular alloy thin films, 219
Magnetostructural phenomena
giant magnetotransport and magnetostructural phenomena in hole-doped manganese oxides, 187
Magnetotransport
giant magneto-transport phenomena in granular magnetic systems, 127
spin-transport theory of magnetically inhomogeneous systems, 157
Manganese
anomalous Hall effect in III–V-based magnetic semiconductor heterostructures, 151
Manganese oxides
giant magnetotransport and magnetostructural phenomena in hole-doped manganese oxides, 187
Metal–insulator–metal structures
dielectric properties of poly(phenylene-vinylene) thin films, 255
Metal–polymer contacts
dielectric properties of poly(phenylene-vinylene) thin films, 255
Metals
giant magnetoresistance of artificial Ni–Fe/Cu, Ni–Co/Cu and Co–Fe/Cu superlattices and their temperature dependence, 213
studying spin-dependent scattering in magnetic multilayers by means of perpendicular (CPP) magnetoresistance measurements, 77
Metal–insulator–semiconductor structures
spin-polarized STM and its family, 69
Metal–semiconductor–metal structures
interlayer coupling and magnetoresistance in Fe–Si multilayers with semiconducting spacers, 41
Microfabrication
perpendicular giant magnetoresistance of microstructured pillars in Fe–Cr and Co–Cu magnetic multilayers, 85
Mn compounds
epitaxial ferromagnetic thin films and superlattices of Mn-based metallic compounds on GaAs, 117
Mn oxides
giant magnetoresistance in layered Mn oxides, 193
Molecular beam epitaxy
epitaxial ferromagnetic thin films and superlattices of Mn-based metallic compounds on GaAs, 117
Mössbauer effect
magnetic structure of multilayers studied by Mössbauer spectroscopy, 93
Multilayers
density functional theory of the electronic and magnetic properties of interfaces and multilayers, 225
giant magneto-transport phenomena in granular magnetic systems, 127
the application of giant MR films to magnetic devices, 207
theory on the giant magnetoresistance in magnetic layered structures at finite temperatures, 31

Neutron reflection
neutron study on the subject of giant magnetoresistance effect, 57
Nickel
spin-polarized electron tunneling: the importance of the potential barrier shape, 65
Nuclear magnetic resonance
NMR studies of magnetic multilayers, 177

Phonon–phonon interaction
thermal diffusivity, heat capacity and thermal conductivity in Al_2O_3–Ni composite, 287
Photoluminescence
simulation and photoluminescence characterization of transverse electric–transverse magnetic emission of strained $Ga_{0.47}In_{0.53}As/Ga_{0.62}In_{0.38}As$ superlattices, 293
Photonics
dry etching and implantation characteristics of III–N alloys, 309
Plasma etching
dry etching and implantation characteristics of III–N alloys, 309
Polarized neutrons
neutron study on the subject of giant magnetoresistance effect, 57
Polarization effects
spin-polarized STM and its family, 69
Poly(paraphenylene-vinylene)
dielectric properties of poly(phenylene-vinylene) thin films, 255

Quantum well
spin current and exchange coupling in magnetic multilayers, 25

Self-catalytic formation
kinetic studies of the formation of nanocrystalline chromium silicide–silicon carbide from homogeneous amorphous precursor powders, 243
Semiconductor heterostructures
role of surface step on misfit dislocation nucleation and critical thickness in semiconductor heterostructures, 299
Semiconductors
temperature dependence and angular dependence of the giant longitudinal magnetoresistance in GaAs-AlGaAs superlattices, 147
Silicon
rapid thermal annealing of thin doped and undoped spin-on glass films, 319
Silicon carbide
kinetic studies of the formation of nanocrystalline chromium silicide–silicon carbide from homogeneous amorphous precursor powders, 243

Silver ion conductors
a new silver ion conductor for battery applications, 249
SOA
simulation and photoluminescence characterization of transverse electric–transverse magnetic emission of strained $Ga_{0.47}In_{0.53}As/Ga_{0.62}In_{0.38}As$ superlattices, 293
Spin fluctuations
theory on the giant magnetoresistance in magnetic layered structures at finite temperatures, 31
Spin injection
spin injection in metal films: the bipolar spin transistor, 199
Spin-polarized electron states
spin-polarized electron tunneling: the importance of the potential barrier shape, 65
Step formation
role of surface step on misfit dislocation nucleation and critical thickness in semiconductor heterostructures, 299
Stoichiometry and homogeneity
transport properties of titanium aluminides, L1
Strained superlattices
simulation and photoluminescence characterization of transverse electric–transverse magnetic emission of strained $Ga_{0.47}In_{0.53}As/Ga_{0.62}In_{0.38}As$ superlattices, 293
Superlattices
magnetoresistance in epitaxial Fe–Cr(001) superlattices grown on MgO(001) and sapphire($1\bar{1}02$) substrates, 169
magnetoresistance in magnetic multilayers: a role of Fermi velocity, 111
NMR studies of magnetic multilayers, 177
transport properties of titanium aluminides, L1
Surface structure
sintering of ultrafine acicular TiO_2 powder, 261

Theory of electric transport
giant magneto-transport phenomena in inhomogeneous materials, 11
Theory of electron transport
giant magnetoresistance in layered Mn oxides, 193
magnetoresistance in magnetic multilayers: a role of Fermi velocity, 111
Thermal conductivity
thermal diffusivity, heat capacity and thermal conductivity in Al_2O_3–Ni composite, 287
Thermal diffusivity
thermal diffusivity, heat capacity and thermal conductivity in Al_2O_3–Ni composite, 287
Thermal properties
field dependence of transport properties correlated with the giant magnetoresistance, 101
Thin films
giant magnetoresistance of artificial Ni–Fe/Cu, Ni–Co/Cu and Co–Fe/Cu superlattices and their temperature dependence, 213
interlayer coupling and magnetoresistance in Fe–Si multilayers with semiconducting spacers, 41
magnetic structure of multilayers studied by Mössbauer spectroscopy, 93
spin injection in metal films: the bipolar spin transistor, 199
tunnel-type GMR in metal–nonmetal granular alloy thin films, 219
Titanium
sintering of ultrafine acicular TiO_2 powder, 261
synthesis and characteristics of the ceramic superconductors in the $Y_1Ba_2Cu_{3-x}Ti_xO_y$ system, 239
transport properties of titanium aluminides, L1
Titanium dioxide
sintering of ultrafine acicular TiO_2 powder, 261
Transference number
a new silver ion conductor for battery applications, 249
Tribological properties
enhancement of tribological properties by dynamic mixing of diamond-like carbon/Mo films on steel, 269
Tunnelling
spin-polarized electron tunneling: the importance of the potential barrier shape, 65
spin-polarized STM and its family, 69
tunnel-type GMR in metal–nonmetal granular alloy thin films, 219

X-ray spectroscopy
magnetic properties of multilayers from soft X-ray magnetic circular dichroism, 49

Yttrium
synthesis and characteristics of the ceramic superconductors in the $Y_1Ba_2Cu_{3-x}Ti_xO_y$ system, 239

Zinc oxide
a new silver ion conductor for battery applications, 249
